

Automatic Positioning at Exit of Reheat Furnace

Application:

Laser based feedback for automatic positioning of billets blooms or slabs at exit of reheat furnace.

Solution:

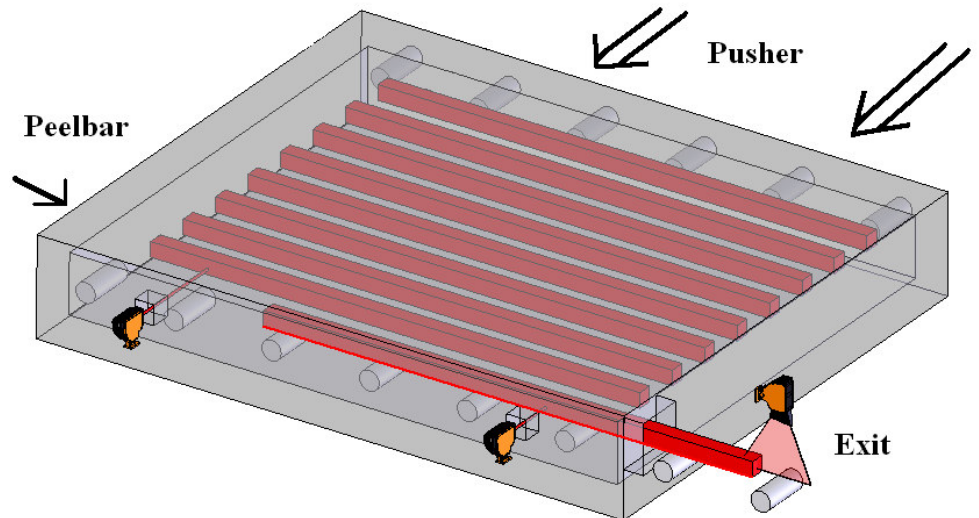

Laser meter to measure the position next billet to be discharged and feed the position to pusher on the furnace entry side.

Equipment:

- LM-3000-F

Features:

- Accuracy
- Non contact
- Safety
- Easy installation and maintenance

Locations:

Reheat furnaces for billets, bloom and slabs
