

Blast Furnace Burden Level Measurement

Application:

Mechanical burden level measuring systems prone to problems when burden accuracy is required.

Solution:

Use of a FMCW microwave non-contact level measuring sensor, which is unaffected by heat, dust, and infrared light

Equipment:

- MWS-3000-K10

Features:

- Non-contact
- Accuracy 1 to 5mm (depending on range)
- Range 0.5 to 80 meters
- Safety
- Easy installation and maintenance

Locations:

Blast Furnace Burden Level
